

## South Otterington Church of England Primary School Waste Reduction Policy

At South Otterington we are committed to protecting the environment by reducing waste.

Objectives:

1. Reduce - using and discarding fewer materials generally; using both sides of a sheet of paper, where possible, and switching off lights and equipment when not in use.
2. Re-use and repair - re-using materials, where appropriate, and repairing/adapting where possible.
3. Recycle - separating materials for recycling, such as paper; cardboard; cans; plastic bottles; printer consumables; rainwater and kitchen waste.
4. Responsibly dispose - comply with the Environmental Protection Act 1990.

The school aims to involve all members of the school community in the successful implementation of this policy.
